The failure to make any payment when due under this Agreement shall be subject to interest at the rate of 2% per month on such amount(s) until paid. NSF cheques are subject to a \$50 service charge in addition to any interest accrued.
- d. The Builder reserves the right to substitute items of equal or better quality. Standard features are subject to change without notice. Model homes may have features that are optional upgrades to the Standard Home Features and are not included in the Contract unless expressly indicated in the Purchase Agreement.
- e. **All materials must be sourced through Builder's suppliers.**

Schedule C
The Building Process

Of Special Consideration

The following structural items must be addressed EARLY in the building process and may be considered only if the unit has not passed a certain point in the building process.

Windows & Exterior Doors	Requested changes should be made with Sales Staff at time of contract. Changes can only be accepted if orders have not yet been placed & conditions of sale have been removed.
Solar Tube	One solar tube is standard in each unit. Solar tubes are located in kitchen except those exterior units with windows on living side; solar tubes moved to main bath. Additional solar tubes may be purchased prior to shingle installation at \$950 ea. After shingle installation, an additional cost of \$150 is applied (\$1100 total)
Finished Basements	Due to scheduling constraints, requests for partial or fully completed basements are preferred at the contract stage and will only be accepted prior to the commencement of framing.

The Building Process

Step 1: Determine Floor Plan & Structural Options

- At time of contract, you will make a number of decisions including floor plan, bath option (ie Standard bath, Whirlpool bath or Ensuite bath) and selected upgrades.
- When considering your unit, note that customized floor plans are available but subject to a \$500 design fee

Step 2: Customize your New Home

Our Project Manager will meet with you to discuss and document your various selections

Where to start:

Framing Plans	Homeowners will be required to review and approve a framing plan. Careful consideration is required as once signed, changes are subject to a \$500 design change fee, in addition to any time & materials required for the change.
Plumbing Fixtures	Models are furnished with high quality, standard fixtures from suppliers such as Maax and Moen. Note: Shower doors are considered an 'extra.' Changes or upgrades to any fixtures are available through Emco (2740 Temple Dr., Windsor 948-8131). Should you choose a non-standard fixture, staff will be able to explain the price difference and fax a copy of your selections to our office.
Heating & Cooling	Outlets are placed to maximize heating & cooling efficiency. Locations are not negotiable.
Electrical	Homeowners will be required to review and approve an electrical plan including location of all plugs, switches, light fixtures, phone and TV outlets. Again, careful consideration is required as once signed, changes are subject to a \$500 change fee, in addition to any time & materials required for the change.
Lighting	<i>Relighting</i> (10 Renaud St., Amherstburg 736-8366) has a large selection of lights to suit a variety of budgets. Lights purchased from other suppliers are accepted but must be labeled with room location and delivered along with necessary bulbs to the job site no later than one week prior to close. Installation requests after this time subject to additional charges. Note: Door bells & hood fans are included with your unit and are

	not purchased through your \$750 lighting allowance.	
Cabinets & Counters	All cabinets are crafted by <i>Designworks Cabinetry</i> . Door samples, stain colours, hardware options, laminate counter samples and other details are available in our showroom.	
Flooring	Ceramic Tile & Carpet	Carpet and tile are standard in our units. Carpet may be selected from our sample show room. Tile & decorative inserts and borders are available at <i>Centura Floor & Wall Fashions</i> (3155 County Rd 42 966-3580) or <i>Palazzi</i> (3636 Walker Road 969-3941) The staff will assist you, explain any extra charges and fax your selections to the office.
	Hardwood & Laminates	A large selection of hardwood and laminate flooring is available in our showroom or at <i>Palazzi</i> . Please note that hardwood and laminate flooring is an upgrade.
Paint & Trim	Paint	One paint colour chosen from the Pittsburgh paint deck and off-white ceilings is standard. Walls are painted with 'eggshell' and ceilings with 'flat' latex paint.
	Trim	All painted window, door and floor trim is painted with durable semi-gloss off-white paint. Oak, maple and mahogany trim is available as an upgrade and can be stained to match cabinetry and wood floors.
Fireplaces	<i>Lifestyles by the Firebox</i> in Leamington (107 Erie St. N. 326-8585) supplies all our fireplaces. Upgrades such as inserts, thermostats, remotes & decorative doors are available in their showroom	

Step 4: Set-up Utility Suppliers

Prior to close, homeowners will need to contact the appropriate suppliers to transfer or set-up new accounts

Union Energy (HWT Rental)	1-888-718-6466	Essex Power	519-776-8900
Union Gas	1-888-774-3111	Bell Canada	519-310-2355
Cogeco	519-972-6666	Canada Post	5862 Malden Road
Town of LaSalle	519-969-7770		www.town.lasalle.on.ca

Step 5: Delivery of Applicable Appliances

If you are purchase an over-the-range microwave or hood fan please arrange to have these items delivered 1 week prior to your closing date. **Please note that installation of all other appliances is the responsibility of the homeowner and that these appliances can not be delivered until the closing date.**

Step 6: New Home Presentation

This on-site final meeting includes:

- A room-by-room inspection of your home. Any deficiencies will be noted and where possible addressed prior to closing. Note that once owners have taken possession of their home, paint touch-ups become their responsibility.
- Explanation and orientation on all mechanical and electrical items including furnace, fireplace, air conditioner, hot water tank, water supply system, sump pump, whirlpools, electrical panel, etc.
- Details of the warranty with Tarion, along with warranties for windows, heating & cooling, and any other warrantable items
- Explanation of our After-Sales Service program and how to schedule for work that may be required

Step 7: Moving In

To help make this generally 'stressful' day a little easier, please note the following:

1. On the closing day we will unlock your home in the morning so that you can start moving right away. However, we cannot give you the keys to your unit until our lawyer has informed us the deal has closed.
2. We are responsible for connecting the telephone lines inside your house to the demarcation box outside. Bell Canada is responsible for bringing service lines to your house and connecting them at the demarcation box.
3. We cannot allow you to move items into your house before the closing date. Our insurance will not cover these items in the event they are stolen or damaged.
